Product features

Besides a wide variety of authentic decors, Parador laminate flooring impresses by means of intelligent technology. The Safe-Lock® profile guarantees solid connections, fitting accuracy and stability. All-round edge impregnation protects the planks from damp and edge swelling.

Safe-Lock®

Patented click mechanism with Safe-Lock® profile: Simply put the planks together and securely click them into place.

Increased antistatic

Increased conductivity level reduces electrostatic charge.

Edge swell protection

Swell-resistant fibreboards and all-round edge impregnation ensure reliable edge swell protection.

0-V-joint

Classic jointless installation: the planks are joined together without noticeable gaps to form an overall closed impression and a calm, harmonious pattern.

2-V-joint / Mini-2V-joint

Bevelled long edges underline the generous length effect of the planks and their authentic impression – greater vividness and optical depth in the room.

4-V-joint / Mini-4-V-joint

The all-round bevelled long and end edges result in a pattern with the charm of a real wood floor, as each single plank is emphasised.

Suitable for underfloor heating

Parador laminate floors are suitable for installation on hot water underfloor heating systems.

Guarantee period

Guarantee period in years for commercial or home use.

Wear classes

Wear classes for home or commercial areas.

Art of living meets performance demand

Performance is a permanent feature of our life. Day after day, performance is demanded from us. Delivering performance on a daily basis requires solid ground beneath our feet. For us, the art of living is an appreciation of beauty and to create inspiration out of it at any moment in time.

Parador laminate flooring is distinguished by outstanding functional qualities: Thanks to intelligent technology, it is particularly easy to lay. High quality materials and perfect finishing ensure great durability even for heavy duty use. Furthermore, Parador laminate flooring stands for unique design. Authentic interpretations of high quality timbers and other materials, as well as various surfaces and joint designs provide wide scope for individual creative needs.

What we value

As a wood processing company, we are aware of our particular responsibility for the environment and towards handling natural resources in a sustainable manner. For our real wood products we only use wood from sustainable forestry programmes and deliberately forego the use of tropical timbers. Wood waste is fed back into biomass thermal power stations, thus generating renewable energy. In the production of our laminate flooring and panels, only organic dyes are used for printing the decor papers. All our products are regularly tested by independent institutes for their environmental impact and have been found to be good, meaning that we can apply the well-known "Blue Angel" seal of quality among other things. In order to meet our high ecological and quality standards, we develop and produce exclusively in Germany and Austria, thus ensuring that our products meet your and our quality and sustainability standards in every respect. This also applies to our new vinyl range, which is not only distinguished by the sensitive purchase of relevant raw materials, but is also allowed to bear the "made in Germany" label of origin.

Classic 1040

Laminate Classic

Laminate Classic in block and wideplank looks opens up a wide scope for design thanks to numerous decors and textures. What is more, the floors in this collection are available in three different qualities and can therefore be individually selected for different usage requirements. Laminate Classic can be combined with both classic and modern style elements and is the ideal choice for a timelessly elegant floor design that goes beyond short-lived fashions.

Laminate Trendtime

Trendtime turns current international furnishing trends into high quality laminate floors and offers a wide range of authentically interpreted exclusive timbers, individual finishes made of expressive natural materials and creative graphic motifs. The genuine look of the decors is underlined by the matching surface texture. With six different formats, great variability in terms of the installation pattern and various joint patterns, floors can be created in an attractive and contemporary fashion very much according to individual tastes with this collection.

Surface design

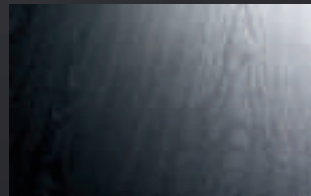

Authentic texture

Grain and knots of the decor are picked up on / Distinctive wood texture: tangibly natural, genuine impression.

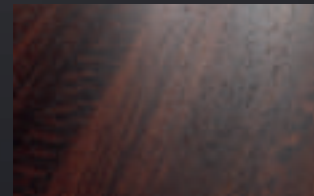

Design texture

Fine, universal groove texture embossing: the stripy decor look is tangibly and optically underlined.

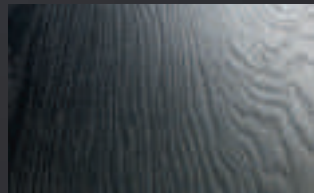

Elegant texture

Areas emphasised with branches and flowers enhance the natural quality of the decor – in an optical and tangible manner.

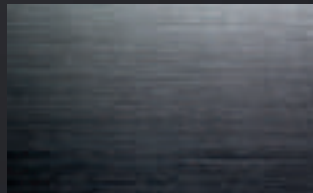

Fine-grained texture

Discreet wood texture with fine pores: lively and at the same time refined look.

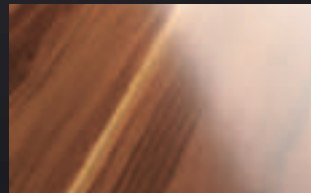

Brushed texture

Naturally pleasant feel of a wood texture through the effect of a sand-blasted, brushed surface.

Flamed texture

Rough, porous surface: striking and calm areas underline the rustic quality of the stone decors.

Shiny texture

Particularly smooth surface: luxurious, exclusive sheen.

Wood texture

Universal wood texture embossing: impression of real wood, optical and tangible.

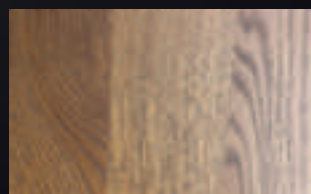

Marbled texture

Alternating matt and shiny textures: vivid and relief-type look reminiscent of old filling techniques.

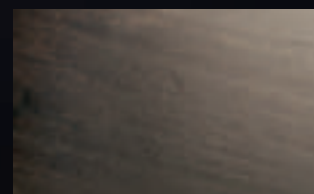

Satin finish

Refined, matt look: characteristic radiance of oiled solid timbers.

Real texture

Tangibly matched to the decor grain; especially designed for selected block decors.

Rustic texture

Look of roughly cut wood, as can be found in old farmhouses for example.

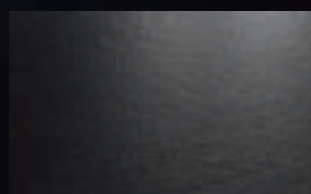

Rough-sawn texture

Characteristic rough, porous surface of sawn timber; particularly fashionable used look with saw marks.

Matt finish texture

Porous, fine-veined look of untreated timbers: invites you to touch it; particularly intensive haptic experience.

Stone texture

Universal embossing: designed around modern stone floors; tangible uneven patches just like real stone!

Vintage texture

The incomparable charm of days gone by comes to life through special wood looks (knots, cracks, filled areas).

Besides a large number of decors, Parador laminate flooring is distinguished by a variety of surface textures, which together with the decor enhance the authentic effect of the floor.

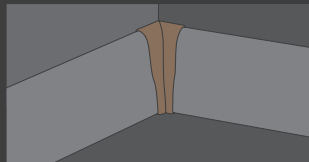

Laminate skirtings and accessories

The Parador range of accessories provides everything you need to properly install Parador laminate flooring: high quality underlays, which are ideally suited for different installation situations and purposes, plus elegant and functional skirtings in various profile shapes and decors, which are used to create perfect finishes and transitions to adjoining areas.

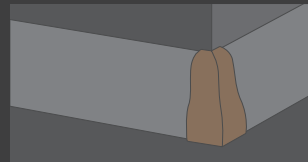

Moulding caps and corners

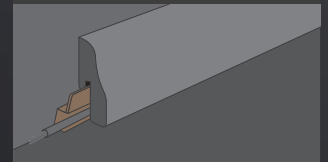

End or transition cap for skirtings SL 2, SL 4 and SL 18. Available in a choice of beech, aluminium, gold or smoked oak look.

Interior and exterior corners for skirtings SL 2, SL 4 and SL 18. Available in choice of beech, aluminium, gold or smoked oak look.

Moulding clips

Clips for fastening skirtings and for routing loudspeaker, telephone, network and antenna cables.

Underlays

Uno-Protect

The highly resilient underlay for all dry substrates.

Duo-Protect

The 2-in-1 underlay with moisture protection and impact noise insulation combined.

Akustik-Protect 100

The 1.8 mm thick high-tech acoustic mat that insulates ambient and impact noise.

Akustik-Protect 200

The 2.0 mm thick high-tech acoustic mat that insulates ambient and impact noise.

Plan-Protect

The practical impact noise underlay made of natural wood fibres.

Akustik-Protect 300

The 2.8 mm thick high-tech acoustic mat that insulates ambient and impact noise.
