Product features

Elastic floors from Parador make the outstanding properties of flexible plastics their own. Besides their impressive looks, Parador vinyl floors are distinguished by their functional composition, intelligent installation technology and outstanding properties in terms of robustness and comfort.

Impact sound insulation

Vinyl is already much quieter than other floors. In the case of vinyl with an HDF fibreboard, an additional integrated cork layer on the back enhances this effect.

Comfort-Click

The Parador click mechanism guarantees easy installation without tools.

Safe-Lock®

Patented click mechanism with Safe-Lock profile. The planks can be put together by being securely clicked into place.

Swell-resistant fibreboard

The swell-resistant fibreboard ensures reliable protection against moisture.

Suitable for damp areas

Parador vinyl floors made of solid material are water-resistant and hence ideally suited for the bathroom and kitchen.

Suitable for underfloor heating

Parador vinyl floors are suitable for installation on hot water underfloor heating systems.

Increased antistatic

Increased conductivity reduces electrostatic charge – for a plus in well-being.

Antibacterial

The special surface coating on the vinyl floor has a repellent effect against dirt and bacteria – and thus contributes towards hygiene and health in the home.

Highly flame resistant

Vinyl has a particularly high flame resistance. All Parador vinyl floors fulfil DIN EN 13501-1 and meet fire protection classification Bff-s1.

4-sided V-joint

The discreetly bevelled long and end edges create a harmonious installation pattern.

Guarantee period

Guarantee period for commercial or home use.

Wear classes

Wear classes for home, commercial and industrial areas.

Art of living meets performance demand

Performance is a permanent feature of our life. Day after day, performance is demanded from us. Delivering performance on a daily basis requires solid ground beneath our feet. For us, the art of living is an appreciation of beauty and to create inspiration out of it at any moment in time.

Modern life is characterised by flexibility and a particular demand for quality and style. Vinyl floors from Parador meet this demand in every respect. The wide variety of decors in the Basic, Classic and Trendtime ranges provide individual creative freedom for every style. Vinyl floors are highly durable, robust, easy to clean and are therefore ideally suited for heavily used areas. Furthermore, vinyl made of solid material is resistant to damp. The special surface coating on resilient floors from Parador also makes vinyl the ideal floorcovering for allergy sufferers – and leaves enough scope for individual creative needs.

What we value

As a wood processing company, we are aware of our particular responsibility for the environment and towards handling natural resources in a sustainable manner. That is why we opted in 2004 for certification according to the two best-known systems for sustainable forestry, the FSC® and PEFC. This documents how responsible we are when dealing with the valuable material that is wood. The wood and wood materials processed come from sustainably managed forests and monitored sources of supply. We feed wood waste back into biomass thermal power stations, thus generating renewable energy. In the production of our laminate floors and panels, only organic dyes are used for printing the decor papers. All our products are regularly tested by independent institutes for their environmental impact and have been found to be good, meaning that we can apply the „Blue Angel“ seal of approval among others. In order to meet our high ecological and quality standards, we develop and produce exclusively in Germany and Austria, thus ensuring that our products meet your and our high standards in terms of quality and sustainability. This also applies to our new vinyl range, which is not only distinguished by the sensitive purchase of relevant raw materials, but is also allowed to bear the „made in Germany“ label of origin.

Product overview

Vinyl with HDF fibreboard

Assortment	Product name	Product number
Basic 30	Oak natural wood texture	1442047

Vinyl with HDF fibreboard

Properties of vinyl with HDF fibreboard

- › The natural material cork reduces sound impact
- › Premium class due to 9.60mm thick planks
- › Safe-Lock system
- › 3 different formats
- › Modern, flexible, stylish
- › For everyday use: robust + easy to clean
- › Comfortable: warm to the feet + non-slip
- › Healthy in the home: antistatic + antibacterial
- › Suitable for underfloor heating

Product composition of vinyl with HDF fibreboard

① Transparent, durable polyurethane coating

② Transparent vinyl wear layer

③ Printed vinyl decor layer

④ Vinyl support layer

⑤ HDF fibreboard with click connection

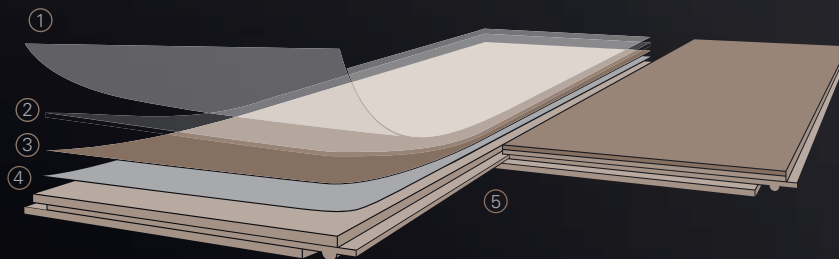

⑥ Cork layer for impact noise insulation

Vinyl made of solid material

Properties of vinyl made of solid material

- › Suitable for damp rooms
- › Renovation-friendly due to low installation height
- › Comfort-Click system for installation without tools
- › Modern, flexible, stylish
- › For everyday use: robust + easy to clean
- › Comfortable: warm to the feet + non-slip
- › Healthy in the home: antistatic + antibacterial
- › Suitable for underfloor heating

Product composition Vinyl made of solid material

① Transparent, durable polyurethane coating

② Transparent vinyl wear layer

③ Printed vinyl decor layer

④ Stabilisation layer

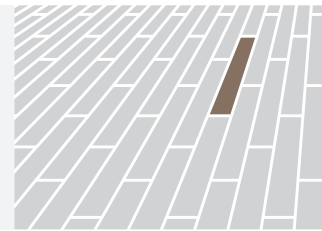

⑤ Vinyl support layer with click connection

Vinyl with HDF fibreboard

Vinyl Basic 30 features all the positive properties that belong to the basics of a robust floor – an ideal entry-level product in the resilient floor coverings segment.

Basic 30

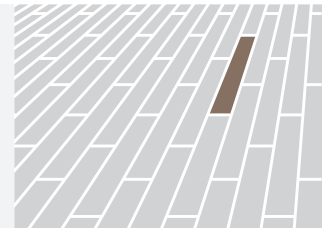

- › Format: 1207 × 216 × 9,4 mm
- › Wear layer: 0,3 mm
- › Vinyl layer: 1,8 mm
- › Cork layer: 1 mm
- › Textured surfaces
- › Vinyl with HDF fibreboard

Vinyl Classic 2030 stands for timeless elegance in a wideplank format. Seven different wood decors and three different surface textures provide a wide selection, in which classically timeless and modern furnishing styles are equally reflected.

Classic 2030

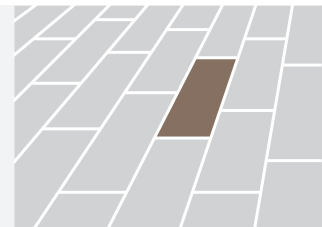

- › Format: 1207 × 216 × 9,6 mm
- › Wear layer: 0,55 mm
- › Vinyl layer: 2 mm
- › Cork layer: 1 mm
- › Textured surfaces
- › Vinyl with HDF fibreboard

Vinyl Trendtime turns contemporary trends into high quality, robust floors from Parador. Two stone decors in a distinct tile look and three wood decors in a chateau plank format provide ways of creating a contemporary, modern design on the floor.

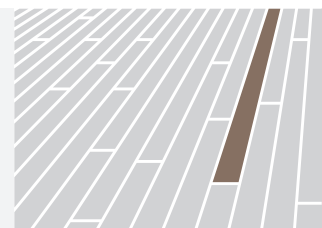

Trendtime 5.30

- › Format: 598 × 292 × 9,6 mm
- › Wear layer: 0,55 mm
- › Vinyl layer: 2 mm
- › Cork layer: 1 mm
- › Textured surfaces
- › Vinyl with HDF fibreboard

Trendtime 6.30

- › Format: 2200 × 216 × 9,6 mm
- › Wear layer: 0,55 mm
- › Vinyl layer: 2 mm
- › Cork layer: 1 mm
- › Textured surfaces
- › Vinyl with HDF fibreboard

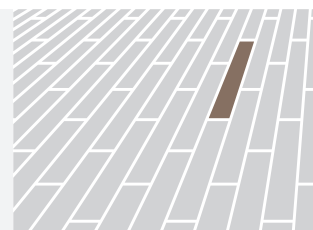

Vinyl made of solid material

Vinyl Basic 50, the entry-level product in the Parador vinyl collection made of solid material, is a durable floor covering, which withstands the widest variety of loads and is also ideally suited for installation in damp areas.

Basic 50

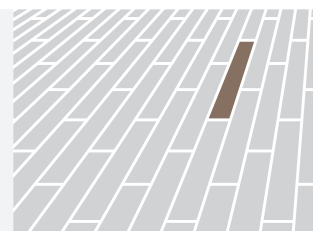

- › Format: 1209 × 219 × 5 mm
- › Wear layer: 0,3 mm
- › Vinyl layer: 5 mm
- › Textured surfaces
- › Vinyl made of solid material

Vinyl Classic 2050 allows both traditional and modern furnishing styles to be implemented. The range with eight different decors in the wideplank format also enables stylish design on the floor of frequently used areas.

Classic 2050

- › Format: 1209 × 219 × 5 mm
- › Wear layer: 0.55 mm
- › Vinyl layer: 5 mm
- › Textured surfaces
- › Vinyl made of solid material

Vinyl Surface design / Accessories

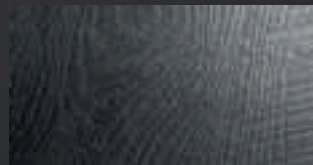

Surface design

Parador elastic floors made of vinyl are characterised by distinct surface textures, which reinforce the authentic effect of the floor.

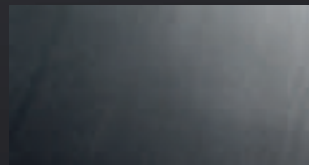

Brushed texture

Naturally pleasant feel of a wood texture through the effect of a sand-blasted, brushed surface.

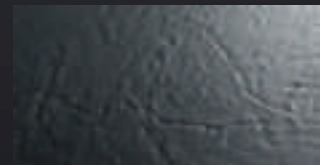

Rough sawn texture

Characteristic rough, porous surface of sawn timber; particularly fashionable used look with saw marks.

Wood texture

Universal wood texture embossing: impression of real wood, optical and tangible.

Stone texture

Universal embossing: designed around modern stone floors; tangible uneven patches just like on real stone!

Accessories

The Parador range of accessories provides everything you need to properly install vinyl: elegant and functional skirtings, plus high quality underlays* for different installation situations and purposes.

Please take note of the information in the vinyl advice section at: www.parador.de

<p>Uno-Protect</p> 	<p>Duo-Protect</p> 	<p>Akustik-Protect 100</p> 
<p>The highly resilient underlay for all dry substrates.</p>	<p>The 2-in-1 underlay with moisture protection and impact noise insulation combined.</p>	<p>The high-tech acoustic mat offering ambient noise and impact noise insulation with vapour and moisture protection.</p>
<p>Akustik-Protect 200</p> 	<p>Akustik-Protect 300</p> 	<p>PE film</p> <p>If a Parador underlay is not used, when installing on mineral subfloors it is necessary to lay the 2 mm thick PE film as a vapour and moisture protection.</p>
<p>The high-tech acoustic mat offering ambient noise and impact noise insulation without a moisture barrier.</p>	<p>The high-tech acoustic mat.</p>	

Skirting SL 20

- › Format (L x W x H): 2570 x 16.5 x 70 mm
- › Decor profiles with high quality MDF core
- › Suitable for damp rooms
- › Torsion-free
- › Fully encased at edges
- › Excellent surface quality

Matching end caps and transition caps as well as external and internal corners in aluminium look are available in the Parador range, as is the matching moulding clip.

*For vinyl made of solid material, we recommend the underlays from the Akustik-Protect range. The underlays Uno-Protect and Duo-Protect are only suitable for vinyl with an HDF core board.
